

RECENT PROJECT MABLE TYLECOTE

Project Overview

Connell Brothers were appointed as Principal Contractor by Manchester Metropolitan University to carry out the complex demolition of the Mable Tylecote building on Oxford Road, Manchester. The project involved façade retention and hand separation works to the Grade 2 listed building in a 'live' city-centre environment. Connell Brothers carried out a ground penetration survey which identified nine historic underground chambers. The historic 19th-century façade was then retained using over 40 tonnes of concrete taking into consideration the various chambers locations underneath the pavement of Oxford Road.
